### K18 BIOMIMETIC HAIRSCIENCE

**What is K18?**  
 The K18Peptide™ molecular repair service is a bioactive 2-step in-salon treatment infused with our patented K18Peptide™. K18 Mist - K18 Professional Mist is a pre-service treatment that strengthens hair before a chemical service. The pH level of 7.5-8.0 shifts the cuticle layer to penetrate into hair's cortex and hone in on damage sites. K18 Professional Mask is a post-service treatment that repairs damage caused during any salon service. With a pH level of 5.0-6.0, the mask helps to close the cuticle and seal in the peptide, with added lightweight conditioning benefits to keep hair smooth and soft.

K18Peptide™ is the patented molecular breakthrough clinically proven to reverse hair damage (in just 4 minutes) from: Bleach + Color, Chemical Services, Heat

**How does K18 work?**  
 When hair gets damaged, the polypeptide chains (keratin chains) that make up the inner structure of hair strands become weakened and break. For context, there are billions and billions of polypeptide chains (keratin chains) in a single strand of hair. When these are damaged, hair's core structure responsible for elasticity and strength becomes compromised and as a result it loses its resiliency and shine—or the look and feel of healthy hair.
